## DETECTS MOTION. DELIVERS SAFETY.

Now ensure better safety for your loved ones with P2P fixed cameras from Ozone. Featuring person to person motion detection and remote access, these Wi-Fi enabled smart cameras swiftly notify whenever a motion/person is detected in the house via mobile app. Besides, its innovative two way communication allows you to have clear & loud conversation. What's more, its infra-red night vision allows you to keep a watch on every corner of your house, inside or outside, even during the night. So you enjoy unmatched security and complete peace of mind, anytime, anywhere.

## DOWNLOAD

OzoLife is available for both iOS and Android OS. Search the name 'OzoLife', in App Store or Google Play, or scan the QR-Code to download the App

### SUPPORTS

iPad

iOS

Android

Download App (iOS & Android)

# CONNECTION

## SET UP ROUTER

The router only supports 2.4GHz Wi-Fi (doesn't support 5GHz). Please set the parameters of the router before connecting to the Wi-Fi network, and record the SSID and password of your Wi-Fi.

Please keep network available

2.4GHZ

5GHZ

## REGISTRATION PROCESS

### STEP 1

Open the OzoLife App, click "Register", read the "Privacy Policy" and click "Agree".

## STEP 2

Enter a legal and valid mobile number or email address and click "Continue".  
Enter the Verification Code received to log into the app.

**Register**

India

Email

Get Verification Code

The 'Register' screen features a white background with a dark header. Below the title, there are two input fields: one for the country (pre-filled with 'India') and one for the email address. A blue button labeled 'Get Verification Code' is positioned at the bottom of the form area.

**Verification Code**

Verification code has been sent to admin@gmail.com.  
(Send a SMS)

The 'Verification Code' screen has a white background with a dark header. Below the title, there is a blue horizontal line. Underneath, a message states: 'Verification code has been sent to admin@gmail.com. (Send a SMS)'. The text is in a light gray color.

# QR CODE CONFIGURATION

- 1 Open the Ozolife App. Click on "Create Family" and then customize the family name and related settings.

# QR CODE CONFIGURATION

- 2 Continue to click "Video Surveillance" >> "Smart Camera", and then choose "Add Device" or "+", to add camera.

# QR CODE CONFIGURATION

- 3 On the "Add Device" interface, continue to click on "next step". Enter your Wi-Fi password when prompted.

## Note:

- 1) Camera only supports 2.4GHz WiFi network.
- 2) The number of bits in the SSID and passwords of the router should not exceed 24 digits.

# QR CODE CONFIGURATION

- 4 Scan the QR code on your phone with the camera on your fixed camera. Once you hear the beep, proceed to complete the configuration.

## Scan with the camera

When you tap **CONTINUE**, the mobile phone displays a QR code. Hold the camera 15 to 20 cm in front of the mobile phone for the camera to scan the QR code.

**Continue**

Heard nothing at all

**Heard the beep**

# QR CODE CONFIGURATION

- 5 When connecting, you should make sure your router, mobile and camera are as close as possible. When camera is added successfully, click "✔". You can also customize the camera's name.

## MOTION DETECTION

Motion sensors send an instant notification whenever movement is detected.

## RECORD

Record every moment using high capacity SD card storage.

## DAY & NIGHT

Powerful night vision means no interruptions, even in complete darkness.

# FUNCTION

## DAY

## NIGHT

## FAQ

### Q: The device cannot be previewed properly?

A: Check whether the device is connected to the network. Place the device close to the router, and if it is still not working, reset the device and add it again.

### Q: Why is it still in the list of devices after resetting?

A: The reset button only resets the network configuration of the device, but cannot change the configuration on the App. To remove the device, it must be deleted from the App manually.

### Q: How to move the camera network to another router?

A: First remove and reset the device on the App and then configure the device again using the App.

### Q: Why doesn't the device identify the SD card?

A: It is recommended to plug in the SD card after a power cut. Confirm whether the SD card is normally available and is in FAT32 format. The TF card can't be identified when the internet connection is fluctuating.

### Q: Why I can't get the notifications on my mobile App?

A: Please confirm that the App has been running on the phone, and the relevant reminder function has been opened; message notification and authority confirmation in the mobile phone system have been opened.
